

HOW IT WORKS

You can now load money directly onto your son's cashless smart fob

The money is stored securely and available to spend for catering and secretariat purchases.

It is hoped to expand the use of the smart-fob at a later date.

Today your son has received a specially programmed smart-fob with a smart chip using RFID Technology.

This fob will be programmed for each pupil and will be used to access their Debitrak cashless wallet securely stored on the new system.

WHAT IS DEBITRAK?

This year the College is introducing a new cashless card solution in partnership with Debitrak. Each student is being provided with a smart- fob that can be used for catering purchases and in the secretariat.

IT'S FAST AND EFFICIENT

For lunches and evening meals, simply use your smart-fob with money stored in your student cashless card account. The new Point of Sale (POS) Terminals will have a special reader where the fob is used to pay. Every time your fob is presented at the reader, your balance is displayed. The terminals will also accept debit/credit cards.

TOPPING UP YOUR ACCOUNT

From any PC, tablet or mobile device, you can top up your son's account by transferring funds from your debit or credit card. Simply log on to the website and follow the simple instructions. Once completed, your top up will be automatically delivered to your son's account. Topping up of your account can also be done in College by using the cash loader located by the secretariat.

In addition, you will be able to see what is being purchased every day.
